Executive Summary

The Nevada Revised Statutes (NRS) 232.920 requires a quarterly report by the Department of Employment, Training and Rehabilitation which disaggregates the rate of unemployment by demographic groups for each county within the State utilizing currently available information, and to post this report on their website. This report is also available on the website for the Research and Analysis Bureau within the Department. Additionally, this report is provided to the Governor's Workforce Development Board, as well as other applicable agencies providing workforce development services.

NRS 232.935 mandates the Governor's Workforce Investment Board require all applicable agencies which provide workforce services to coordinate efforts and resources in order to reduce the rate of unemployment for specific demographic groups when certain thresholds are met:

1. When the unemployment rate is at least double (200 percent) the rate of unemployment for the county as a whole.
2. When the unemployment rate is at least four percentage points higher than the rate of unemployment for the county as a whole.
3. When the unemployment rate has been higher than the rate of unemployment for the county as a whole for at least three consecutive years.

Pursuant to these requirements, available information from the U.S. Census Bureau's American Community Survey highlights particular groups around the state who are most likely to face higher unemployment rates than the region as a whole.

For the State's three most populous areas, the summary of the available information[1] for 2017 is as follows:

County Information & Data Sources

For purposes of satisfying the specific requirements of NRS 232.920, this Report utilizes the U.S. Census Bureau's American Community Survey (ACS) to generate demographic profiles of the unemployed by county. The ACS is a nationwide survey that provides information every year on the demographic, social, economic, and housing characteristics of the nation's population.

The Survey produces single-year and multiyear estimates. The one-year estimates provide information for geographic areas, including counties, with populations greater than 65,000. In Nevada, 15 of 17 counties do not meet that threshold.

ACS multiyear estimates produce results covering a five-year period. These estimates are relatively reliable, especially for Nevada's smaller counties.

Unfortunately, in the process of generating reliable and comparable information for all counties in Nevada, timeliness becomes an issue. The most recent information covers the 2013-2017 period. In Nevada as a whole, 18,300 households (out of a total of 1.15 million) were interviewed as part of the ACS in 2017.

The 2014-2018 figures from the U.S. Census Bureau will be available in December 2019.
