Eureka/Lander/Humboldt Pay the Highest Average Weekly Wages; Lyon Realizes Highest Rate of Growth

Wage Growth by County

- In the Quarterly Census of Employment and Wages (QCEW) Program, the Research and Analysis Bureau collects and compiles employment and wage data for workers covered by Nevada unemployment insurance laws, and federal civilian workers covered by Unemployment Compensation for Federal Employees.
- Based upon this information, Nevada wages averaged \$961 per week for the second quarter of 2019. This is a 3.3 percent increase relative to the same period in 2018. Weekly wages range from \$740 (Lincoln) to \$1860 (Eureka). Eight counties have payrolls above \$1,000 per week. In six of the eight counties this is likely attributable to a relatively high concentration of mining employment. In Storey County, manufacturing contributes strongly to the relatively high wages.
- As for Nevada's major population centers, Carson City wages averaged \$989 per week for the second quarter of 2019. Washoe County, at \$979, came in just above the statewide average. Clark County was slightly below State average at \$943 per week.
- Change in weekly wages range from -0.7% (Churchill) to 8.5 % (Lyon). 15 of 17 counties experienced an increase in average weekly wages in this year's second quarter. The increase in wages in Lyon County is due to wage increases in Utilities and Construction.
- As for Nevada's major population centers, Carson City grew at a rate faster than the Silver State at 3.5%. Washoe County experienced a wage increase higher than the statewide average at 3.7 percent. Wages in Clark County grew at a rate higher than that of the Silver State at 3.1%.
